

PRESS RELEASE

Sydney, Australia, 10th January 2006: **MyNetFone** is chosen by the leading Australian magazine PC User as the "**Product of the Year 2005**".

The magazine says, "Despite stiff opposition, **MyNetFone** was the obvious choice as the **Communications Product of the Year**. Obviously with so many great products to choose from, we agonized over the decision".

It says, "It wasn't the first provider of residential VoIP services in Australia. But **MyNetFone** quickly became the best. It is easy to set up. Plug it into your broadband router and any standard telephone, and you'll quickly be saving money on your phone calls. Its call quality was consistently very good in our tests, with none of the voice lag associated with some software - based VoIP services. Best of all, its plans offer incredible value, with its **MegaSaver** plan, for example, including untimed calls to anywhere in Australia for just 10 cents each and calls to US & UK for 2.5 cents per minute".

The nomination of **MyNetFone** by PC User magazine as the **Product of the Year 2005 & Communication of the Year** follows a series of reviews and tests that had been conducted by leading magazines and newspapers with many VoIP operators in 2005. **MyNetFone** has consistently been rated as the best quality and excellent value of broadband VoIP phone service.

"We are very delighted and honoured that **MyNetFone** has been chosen by the leading magazine in Australia, **PC User**. We appreciated the excellent support that we have received from our customers and partners throughout the year and we never take anything for granted. Our team has been working incredibly hard in 2005 and it is gratifying that our efforts have been recognized. Our **MegaSaver** plan has been extremely popular with our customers who pay only \$9.95 per month and enjoy 10 cents **untimed** calls to any landline phone in Australia, anywhere & at anytime. There is no lock in contract, no connection fee and no flag fall". said Leo Tai, Director of **MyNetFone**.

Mr. Tai adds, "We are excited about 2006 and look forward to bringing out a range of innovative, quality products to better serve our residential and business customers".

About MyNetFone

MyNetFone is Australia's leading broadband phone services offering low local, STD, international and fixed to mobile call rates to residential and business users. The service is renowned for its excellent voice quality and real time account portal used by customers for viewing call records and recharging call credits. Customers can use a wide variety of devices including single and multi-port telephone terminal adaptors, IP phones as well soft-phones to enjoy the service.
